Keying Dai

DIGITAL ARTIST 3D ANIMATOR CREATIVE TECHNOLOGIST

Montreal + Toronto keyingdwork@gmail.com 438-921-8452 Portfolio LinkedIn

EDUCATION

OCAD University

BFA (Hons), Experimental Animation

Toronto | 2023–Present

Expected completion: 2027

PROFILE

Experimental animation student working across wearable electronics, immersive media and visual communication. Interested in how people interpret information and interact with physical and digital systems.

TECHNICAL SKILLS

Interactive media
Unity (C#), Meta Quest, SteamVR, Unreal Engine 5, Meta Spark, GameMaker, Twine

Interface and visual design
Figma, Illustrator, Photoshop, Procreate; user flows, wireframes and prototyping

3D and animation

Maya, Blender, Substance 3D Painter, After Effects; modelling, rigging and character animation

RELEVANT COURSEWORK

Intro to Wearable Electronics
Advanced Wearable Electronics (in progress)
XR Space Jam
Game Engines

RELEVANT EXPERIENCE

Co-founder, Art & Visual Identity Lead

May 2026–Present

Telotia | Montreal, hybrid

Develop visual identity, logo direction, website imagery and communication assets for a claim-to-evidence validation startup. Translate technical concepts into visual materials for product communication and public presentation.

3D Animator

Aug 2024–Present

Empowered Futures | Toronto, remote

Create 3D assets, character animation and campaign visuals for mental-health initiatives using Maya and Adobe tools. Collaborate on visual narratives for young adults.

VR Exhibition Assistant

Sep 2024

OCAD University + French Embassy | Best of Cannes

Supported headset setup and maintenance, visitor guidance, bookings, opening activities and daily exhibition operations.

SELECTED PROJECTS

In Focus Wearable analog circuit
Created a jacket that communicates availability through three selectable light states, with a magnetic control and a separate posture-enabled reminder circuit. Explored how body position and visual cues express personal boundaries.

Breath to Restore 2026 | Unity / Meta Quest 3
Developed and published a VR prototype exploring environmental change, particles and spatial sound. Documented implementation choices and limitations in a development journal; used external models and code assistance. Project and devlog.

Beyond Life Interface prototype / Figma
Developed a health-tracking interface through research, personas, user flows, wireframes and high-fidelity design.

My Virtual Gallery VR exhibition / Unity
Built an explorable exhibition for 3D work, animation and interactive objects, designed for SteamVR and Meta Quest viewing.
